Carbon Footprint

Mannesmann Line Pipe GmbH

avoided

2,080 tonnes of CO₂e

in the period 1st of January 2018 – 31st of December 2018.
compared to the alternative transport by road (freight volume: 190,052 tons).

Based on this analysis, which was conducted with EcoTransIT World,
the environmental impact of your transport services was thus
reduced to 825 tonnes of CO₂e.

Your company is thus supporting the goal to reduce global CO₂ emissions
and contributing to the protection of the climate.
